

What is the purpose of the "Data/Model" view in Power BI?

The Power BI Model view provides a visual representation of the data model, showing tables, columns, and relationships. It also enables users to define relationships

Publish the dashboard to Power BI Service.

ok

Share the report with a colleague (simulate steps).

Publish the dashboard to Power BI Service → send my colleague the link → text him to check it out

Troubleshoot: Slicers not affecting all visuals—how to fix?

1. Check whether relationships between values in the slicer and visuals exist. If not, create.
2. Check if slicer is set to filter all visuals in a page
3. Check if slicer is disabled for certain visuals
